

Contents

1	Starting your project	1
1.1	Python versions	1
1.2	Project layout	2
1.3	Version numbering	5
1.4	Coding style & automated checks	7
1.5	Interview with Joshua Harlow	11
2	Modules and libraries	16
2.1	The import system	16
2.2	Standard libraries	21
2.3	External libraries	23
2.4	Frameworks	26
2.5	Interview with Doug Hellmann	27
2.6	Managing API changes	36
2.7	Interview with Christophe de Vienne	40

3	Documentation	46
3.1	Getting started with Sphinx and reST	48
3.2	Sphinx modules	49
3.3	Extending Sphinx	53
4	Distribution	56
4.1	A bit of history	56
4.2	Packaging with <i>pbr</i>	59
4.3	The <i>Wheel</i> format	61
4.4	Package installation	63
4.5	Sharing your work with the world	65
4.6	Interview with Nick Coghlan	69
4.7	Entry points	72
4.7.1	Visualising entry points	72
4.7.2	Using console scripts	74
4.7.3	Using plugins and drivers	77
5	Virtual environments	81
6	Unit testing	86
6.1	The basics	86
6.2	Fixtures	95
6.3	Mocking	96
6.4	Scenarios	102
6.5	Test streaming and parallelism	106

6.6	Coverage	111
6.7	Using virtualenv with tox	115
6.8	Testing policy	120
6.9	Interview with Robert Collins	121
7	Methods and decorators	125
7.1	Creating decorators	125
7.2	How methods work in Python	132
7.3	Static methods	135
7.4	Class method	136
7.5	Abstract methods	137
7.6	Mixing static, class, and abstract methods	139
7.7	The truth about super	142
8	Functional programming	147
8.1	Generators	148
8.2	List comprehensions	154
8.3	Functional functions functioning	155
9	The AST	166
9.1	Extending flake8 with AST checks	170
9.2	Hy	177
9.3	Interview with Paul Tagliamonte	179

10 Performances and optimizations	185
10.1 Data structures	185
10.2 Profiling	187
10.3 Ordered list and bisect	194
10.4 Namedtuple and slots	196
10.5 Memoization	203
10.6 PyPy	205
10.7 Achieving zero copy with the buffer protocol	207
10.8 Interview with Victor Stinner	214
11 Scaling and architecture	217
11.1 A note on multi-threading	217
11.2 Multiprocessing vs multithreading	220
11.3 Asynchronous and event-driven architecture	222
11.4 Service-oriented architecture	225
12 RDBMS and ORM	230
12.1 Streaming data with Flask and PostgreSQL	234
12.2 Interview with Dimitri Fontaine	241
13 Python 3 support strategies	252
13.1 Language and standard library	254
13.2 External libraries	257
13.3 Using six	258

14 Write less, code more	262
14.1 Single dispatcher	262
14.2 Context managers	268
